The "Monitor Mammoth" scribbles and drawing pads at the News Office. 10 cents each and worth the price. A home product.

Oil News

J. Dumba Esq., of the Regent Oil and Gas Company, accompanied by Dr. Allen, Professor of Mineralogy and Geology at the Edmonton University were in town this week.

They were choosing sites for the location of the first well, and eventually decided to commence operations on the farm of J. A. Hayes and Sons.

The firm, which is backed by English capital, will use a Rotary Drill, the first car-load of their paraphernalia arriving last Tuesday. The above gentlemen remarked that the outlook for future development of the industry is very favorable.

The Gopher-Hole Oil Company has the leases immediate to the present operations.

Grand Stampede

July 8 and 9

The preliminary bills are out announcing the Big Stampede, to be held at the Neutral Hills "Big Gap." We have it on good authority that many changes have taken place in the programme this year, and that things will be run altogether differently to the manner in which they were conducted last year. July 8 and 9 are the days decided on which to hold the affair, and in spite of the fact that so many complaints were voiced re this gathering last year, yet we feel assured that this year will be a couple of days of the best enjoyment ever. Further particulars concerning this Stampede will be given later—watch for the big bills.

A Distinguished Visitor

Lieut-Governor Brett was a distinguished visitor here on Friday, the 14th. He was accompanied by Mr. Shinnick the Railroad Commission and Mr. McGregor, divisional Superintendent. He listened attentively to the arguments put forward by the local Board of Trade re the train service on this line.

Mr. J. C. Matheson, Manager of the Bank here, has purchased a new Overland Car, from the Agent Mr. James Glancey.

\$20 REWARD

Easy money for somebody. Six horses strayed. Black Mare white face and stockings. Weight 1100 lbs. Bay Mare weight 1300 lbs. light under belly. 2 bay yearlings "gelding" coming 2 this spring, white stockings and starr. 1 Iron gray yearling "gelding" coming 2 one eye gone. 1 bay gelding coming 3 this spring. W. stripe in face. Everything is branded 3 right 6

shoulder very faint brand. One big mare is also distinctly branded 6 on left leg. Notify

Board Of Trade Meets

C. P. R. Delegation

Much discussion re Train Service. Nothing definite accomplished. "Leave matter in abeyance" is the slogan of C.P. representative

Last Friday the expected delegate from the Board of Railway Commissioners, Mr. Shinnick, accompanied by the Supt. of the division, Mr. McGregor, arrived in Monitor to discuss with the Board of Trade the pros and cons re the placing of a regular daily passenger service on the Lacombe-Kerrobert branch of the C.P.R.

The town and district were exceptionally well represented about 55 being present at the depot.

Mr Shinnick pointed out that at the present time, the branch was enjoying one of the best services of any branch i.e. daily freight and express. That at present traffic was at its lowest and that the average number of passengers carried each way was but 38. "Wouldn't it be better" said he "to leave the matter in abeyance until such time as traffic and business guarantees a fair return to the railroad? If this train were put on now, it would mean a big depletion in the present freight service"

It was contended that the present poor service was retarding the development of the country along the line. This was practically admitted by Mr Shinnick, as were also the other grievances voiced.

It is not to be wondered at however, the C.P. does not desire to run a train at a loss, but at the same time the impression carries that with their capital, the railroad could at least afford to give it a trial. Whether or not this is done now remains to be seen.

After leaving Monitor the party journeyed west, to listen to the complaints and arguments of other points.

Miss Carroll has undertaken to teach the Junior room at the School here, until such time as Miss Curtis recovers sufficiently to resume her duties.

Terrific Hurricane

Sweeps District

The ancient proverb "Its an ill wind that blows nobody any good" received an awful black eye this week. Anybody that derived any benefit from the awful wind-storm that pretty near blew us off the map, is welcome to it.

Damage, insofar as town property is concerned was slight here, but it is hard to estimate the damage done to the growing crops, much of which must have been blown clear out of the ground. The garage at the rear of Mr. Evans house on Council St, in which the bank boys kept their car, was demolished, and, in passing, endeavored to take with it a telephone pole. Said pole withstood the strain, but looks pretty sick. Several garments that were out on various lines are probably in New York now. A few outhouses, and sundry fences also went down for the count, but nothing serious occurred.

PESTS

The Gopher pest, according to all reports, is well in hand and with a little extra effort and a little more poison—the gopher will be a rare specimen. What are you doing to exterminate these pests? Kill-em quick, Gopherside and Ever-ready are giving splendid satisfaction

Treat your oats with formaldehyde. We still have it at 60c a pound. Dont neglect your spring calves. Use Cutters Blacklegoids or Aggresin. Stock Foods or conditional powders will help your horses loosen up their hides and put them in fine shape. Get a bottle of spring tonic and feel good.

THE KENNEDY DRUG COMPANY

Local Happenings

100 PER CENT INCREASE

Word was received Wednesday last that it now costs twice as much as it did the day before Instructions received by H. A. Warner the local marriage licence issuer, state that in future the sum of 6.00 constitutes the price for a licence. Is there anything left to advance?

Born—To Mr. and Mrs. Rhaflaub on May 2 a son.

Mr Robt. Bowers Pure-bred Percheron Stallion will make the first stand of the season at Monitor on May 27th. Further dates will be announced later.

Service was conducted last Sunday evening at St. Laurence Church by Mr. J. Hamer. Next Sunday Mr. Aug. Hayes will have charge of the service. The last Sunday of the month will be a Musical Service. Mr. Galbraith has kindly consented to preside at the organ, and there will be numerous anthems and selections by the choir. We hope to announce the programme next week.

Mr. F. Barker arrived in town on Friday of last week, to assume duties at the Pioneer Store. He is a returned man. Mrs. Barker and daughter will also make their home here as soon as arrangements can be made for a house and the necessary moving act completed.

We understand arrangements have been made for the first Baseball game of the season to be held on the diamond, on Sunday afternoon next. The match is to be Married vs Single and it is expected a good fast game will result. At the conclusion of the game there will be a general meeting held, for the purpose of electing officers and the team for the ensuing season.

Mrs. Peterson is a visitor in town this week.

Work was commenced on Monday last tearing down the Garage, which will be re-built on its new site. In the interim Mr. Horsch will conduct his business from the old Implement shed across the street.

Hughie McDonald returned to town on Saturday last from Edmonton, at which point he recently underwent an operation for appendicitis. Hugh is much better we are pleased to report.

While the new garage is in process of being built, "My Wardrobe" has moved up the street a little ways into the old Monitor Boarding House.

NOTICE

To all those using the S. E. trail to Monitor from the south—Kindly refrain from crossing the seeded field on n. w. 20 34 44. After this notice, prosecution follows. J.A. Hayes & Sons 22-236p

On Our Western Farms

Announcement by the Canadian Wheat Board that the wheat participation certificates issued by it to the farmers will, it is estimated, be worth not less than forty cents a bushel, came as a welcome surprise to the wheat growers of the country. People who have followed the operations of the Board were confident that these certificates would prove of real and substantial value, but they hardly expected a forty-cent per bushel value. This sum, added to the initial payment on the basis of \$2.15 for No. 1 Northern at Fort William, brings the Canadian fixed price well above the guaranteed minimum price in the U. S., and it is believed by many that in the final out-turn the average price received by Canadian farmers will be equal to the average received by the United States farmers.

The announcement means that when final settlement is made with the farmers for their 1919 wheat crop a distribution of something like \$75,000,000 will take place. The three prairie provinces will, of course, receive the bulk of this large sum. It will mean much to our farmers, will give an added impetus to production throughout the West, and provides a strong argument for a continuance of the policy of national marketing of wheat, at least so long as the European importing countries maintain national buying and selling. Those farmers who followed the advice tendered in this column last year to retain possession of their participation certificates, and not dispose of them to speculators for a nominal sum at a time when their value was problematical have good reason to congratulate themselves.

At no less than three different conferences to be held this summer the problem occasioned by successive crop failures in the drought affected areas of the West will receive careful consideration, with the object of endeavoring to ascertain the best methods whereby this disability may be overcome. One such conference, to be attended by officials of each of the provincial Departments of Agriculture of the prairie provinces, will be held in Winnipeg, July 14 to 18, under the auspices of the Canadian Commission of Conservation. A second conference, to be attended by experts and farmers who have succeeded in the dry areas when most of their neighbors have failed, will be held in Saskatchewan under the joint auspices of the provincial Department of Agriculture and the provincial College of Agriculture. The subject will also be considered at the land settlement congress to be held in Regina from June 8 to 11, at which there will be present representatives of the four Western provinces, the Dominion government, and, it is announced, "many of the greatest experts of the North American continent on the subject of suitable plants for dry areas."

It is known that in many of the so-called dry districts where crop failures are general, certain farmers succeeded in harvesting fairly profitable crops. It is proposed to invite these men to attend one or more of these conferences and recite their experiences, outlining their methods of farming and the nature of the crops grown by them, and then to disseminate this information among farmers generally in the districts referred to.

MURINE Boils, Redness, Swelling, Itch, Smart, Itch, or Burn, if Sore, Irritated, Inflamed or Granulated, use Murine often. Safe for Infant or Adult. At all Drugists in Canada. Write for Free Eye Book. Murine Company, Chicago, U. S. A.

All farmers who have succeeded where others have failed have a patriotic duty to perform in assisting these conferences by every means at their disposal in finding a solution of one of the greatest problems confronting the West.

Although it is yet early to hazard a guess as to the extent of the acreage to be seeded to wheat in Western Canada this year, it is probably quite safe to assume that the preliminary government estimates of a considerable decrease in acreage are correct. The late season has prevented much spring plowing, which will result in a decreased wheat acreage, but reports indicate that the seed is going into the ground well supplied with moisture and under satisfactory conditions, which only requires suitable weather to yield a bountiful crop. At the same time a large decrease in the wheat crop of the United States is anticipated this year, there having been a heavy falling off in the winter wheat crop.

One result in the West will undoubtedly be a substantial increase in the acreage sown to oats and other coarse grains. This will have a beneficial effect, as the past few years have revealed a lamentable shortage of feed grains which has had an adverse effect owing to the rapid manner in which these western provinces are coming to the front in the production of livestock of all classes.

Minard's Liniment Lumberman's Friend.

He Has it Coming
"Should ugly husbands have heavier damages?" was a question raised in a recent divorce action. The better opinion is that the fact that the ugly man must have gone out of his way to get married should tell against him.—London Punch.

Faint and Dizzy Spells. Weakness and Shortness of Breath.

You can generally tell when the heart is affected by the faint and dizzy spells, the shortness of breath, palpitation, throbbing, irregular beating, smothering sensations, weak, sinking, all-gone feeling, choking sensation, etc.

Many men and women become rundown and worn out when otherwise they could be strong and healthy if they would only pay some attention to the first sign of heart weakness.

No remedy will do so much to make a heart regain strength and vigor, regulate its beat and restore it to a healthy and normal condition as Milburn's Heart and Nerve Pills. Mrs. C. A. S. Drake, Paris, Ont., writes: "I have used on towards the second box of Milburn's Heart and Nerve Pills and find they have done me good. I had those fainting, dizzy spells, once in a while, and also weakness and shortness of breath, and would become so choked up at times I could hardly sleep without sitting up in bed. When walking too fast I would have to stop and try to catch my breath. I feel a lot better since I have used your pills and know that they have helped me wonderfully as I have improved very much."

Price 50c. a box at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

The Minard's Liniment Co., Ltd.,
Yarmouth, N.S.

Dear Sirs—Just a few lines in favor of your Liniment. I would not be without MINARD'S LINIMENT for anything, as it will relieve almost anything. When I go hunting I always take a bottle in my pocket. It is the best for cold in the Head I ever used; and for Cold in the Chest, and every other part of a person, and for Sore Throat it has no equal. It is also a good liniment for the hair as I always use it. I have also taken blemishes off of horses with MINARD'S LINIMENT and I would use no other for any reason for Man or Beast, as I think it is the far best.

I Remain,

Yours Truly,
(Signed) DANIEL MAC LAREN

Two Sure Crops
There were 2,348 millionaires in the United States when the war began, and nearly 7,000 when it ended—a fact which causes the Saskatoon Star to reflect that war produces two sure crops, one misery, the other millionaires.—Toronto Globe.

British Tidal Power Scheme

Generate Electric Power From The Tidal Waters

The Ministry of Transport in Great Britain is giving careful attention to the possibility of building a dam across the estuary of the Severn in order to generate electric power from the tidal waters. The ministry has also formed a strong committee to examine the ambitious schemes for electrification put forward by several British railway companies and to lay down principles which will lead to uniformity in electrical and mechanical matters so that through running will eventually be feasible.

CHILDHOOD CONSTIPATION

Constipation is one of the most common ailments of childhood and the child suffering from it cannot thrive. To keep the children well the bowels must be kept regular and the stomach sweet. To do this nothing can equal Baby's Own Tablets. They are a mild but thorough laxative; are absolutely safe and never fail to relieve constipation and indigestion; colds and simple fever. Concerning them Mrs. Jules Ganguereau, Nominique, Que., writes:—"My baby was terribly constipated and suffered day and night. I was advised to give him Baby's Own Tablets and from the age of thirteen months he is a big, healthy, happy boy." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Jerusalem's 3,500 years of history records only 500 years in which the city was independent.

"Diamond Dyes" Made Faded, Shabby Apparel So Fresh And New

Don't worry about perfect results. Use "Diamond Dyes," guaranteed to give a new, rich, fadeless color to any fabric, whether it be wool, silk, linen, cotton or mixed goods. Dresses, blouses, stockings, skirts, children's coats, feathers, draperies, coverings—everything.

The Direction Book with each package tells how to Diamond Dye over any color.

To match any material, have dealer show you "Diamond Dye" Color Card.

He had Met Him

The premier of South Africa, Gen. Smuts, is a hard worker and thoroughly unaffected. Consequently, says Tit-Bits, he hates guah.

"Let me see," said a high and mighty young officer who sat next to him at a reception in London shortly after the Boer war, "haven't we—ah—met somewhere?"

"Yes," replied the General.

"Thought so," remarked the officer, adding with a bored air, "One meets so many people! Let me see, where did we meet?"

"In South Africa," retorted the general curtly. "You surrendered to me during the war."

No Contract Breaker

Tested and Not Found Wanting

Trades unionism in the United States and Canada has fought a good fight with anarchy within its own ranks and proved that labor will keep its contracts.

A light arises amid all the darkening signs of the times. That light shines out of the collapse of the out-law strike on the American railways, and the fate of the same variety of printers' strike in the Montreal Star office. The foundations of free government were tested and not found wanting in an industrial crisis. Labor proved its power to produce and follow a leadership of honor and self-interest.—Toronto Telegram.

Research in Corrosion

Investigations Being Made by Strong Committee

At the recent congress of the British Institution of Metals a valuable report was read on the corrosion of condenser tubes—a subject in which so many engineers are keenly interested. This report was the fifth of a series, recording researches undertaken by a special committee of the institute. Experiments have been made with alloys of copper and zinc, and many suggestions made for avoiding or reducing corrosion. In the British navy trials are being made with oxidized tubes, and a British company has been formed to exploit an electrolytic process which deposits and maintains a protective layer of lime on the surface of the tube.

Canadian Boats Shipping Grain

An interesting statement was made in the house of commons recently by Sir George E. Foster, acting premier, regarding the total export of Canadian grains in Canadian ships as compared with the export in United States vessels. The minister stated that 99.55 percent of the wheat exported was carried in Canadian bottoms as well as 85.94 percent of export oats and 89.65 percent of barley.

Improvement of the Home Surroundings At Small Expense

The attraction of home is not exclusively within the four walls of the building. Its surroundings should be agreeable, especially in the summer, when so much of our time is spent in the open.

To make the home and grounds attractive does not require much effort, and the expense is inconsiderable. What can be accomplished at a minimum of expenditure is shown in the accompanying illustration. The willingness to do so, accompanied by the

given the cottage an attractive, inviting and restful appearance.

Improvement of home grounds can also be accomplished by the expenditure of very little time and money, and the effort will be amply repaid by increased attractiveness. In many portions of Canada, wild shrubs, vines and flowers may be secured, which, under cultivation, rapidly improve. For shade trees, the hard maple and beech may be secured, and the cooling effect of these will be appreciated during warm weather.

The present season should be utilized

Deposits of Sodium Sulphite

Syndicate of English Capitalists To Exploit Deposits Near Calgary

To meet the ever-increasing demand for sodium sulphate for use in the paper mills of eastern Canada, a syndicate of English capitalists interested in the mills have secured rights in two and a half sections of land situated near the Calgary and Edmonton line of the Canadian Pacific Railway, about 30 miles north of Calgary, Alberta, and will commence exploitation of the deposit as soon as machinery can be installed. The deposit is about four feet deep. The plant will be installed in units, each giving an output of about 500 tons monthly. The purity of the deposit, it is stated, is 90 percent. All the capital of the

Greater Interest Shown in Dairying Throughout the West

(By L. A. Gibson, Dairy Commissioner for Manitoba.)

Much has been accomplished by Manitoba, Saskatchewan and Alberta during the past three years through organization and co-operation in developing general dairying and particularly the creamery butter industry. Previous to 1918 each province was separate dairy unit working to different but standards. Today the inter-provincial spirit is strongly developed and instead of there being Manitoba, Saskatchewan and Alberta creamery butter, all of different types, there is Western Canada Creamery butter, of one type made in the three provinces.

This result has been largely secured through the development of the Inter-provincial Dairy Convention started in January, 1918, and held annually in Winnipeg since then. The last convention, held during the third week in February, 1920, was the most representative and successful of all, being coupled with the annual meeting of the National Dairy Council of Canada and every other dairy event of importance in the west, including the second Western Canada Dairy Show. The creamery butter exhibits attracted not only the makers but also produce men and brokers.

The buttermakers' competitions, inaugurated three years ago for the purpose of standardizing the butter of the Prairie Provinces provides for a separate competition to be carried on simultaneously in the three provinces extending over a period of six months. The three makers in each province having the highest average score for the period then enter the inter-provincial competition and prizes are awarded to the competitors in order of merit. The prizes are liberal and

the entries from each province have been numerous. This year there was added the attraction of an "All Canada" competition which brought entries from every province in Canada and, combined with the other classes, gave the Winnipeg conference the largest exhibit of creamery butter ever shown in Canada. In the "All Canada" competition, the first, second and third prizes were won by Alberta, the fourth and fifth by Quebec and the sixth by Manitoba. The score for the first prize was 98 and for the sixth 97.4 or a difference of six-tenths of a point between the first and sixth which indicates a very close competition. The highest inter-provincial award was secured by Saskatchewan, with a score of 97.05.

A number of innovations were introduced into the show. A herd of cows with their records of performance was among the attractions. In addition to the herd of purebreds, from the Manitoba Agricultural College, there was this year set beside them a number of ordinary or scrub cows to emphasize the effect of proper dairy breeding. Up to the present time the dairy show has been conducted under the auspices of the Manitoba Dairy Show, who took over the project and developed it. Much larger show buildings must be obtained and plans are already under way to secure the erection of these.

The men behind the dairy business in the western provinces are definitely aiming for an annual output of 100,000,000 pounds of creamery butter in the three provinces where 2,500,000 pounds are made today. They are facing the question broadly and are disregarding the imaginary boundary lines in their effort to lay the foundation of a great dairy industry for western Canada.

The "Nobody-Cares" Appearance'

The Result Was Surely Worth the Effort.

expenditure of a few cents on morning glory seed, transformed the ugliness of the first picture into the beauty of the second. The surroundings in the first photo have a "nobody-cares" appearance and are far from inviting. In the second picture, the foliage has

been given attention to this feature of making home a real home, and an asset to the community. The initiation of an improvement by one resident is very often the incentive to many, with the result that the entire district is benefited.

company is subscribed. Coal is found conveniently near to the site where the plant is to be installed.

It is not anticipated that the new industry will be of a very permanent character. It is intended to meet an abnormal situation the price of sodium sulphate having risen from about \$3.25 a ton before the war, to as high as \$23 and \$24 a ton at the present time.

This abnormal price is due to the practical closing down of certain chemical plants, which produced sodium sulphates as a by-product during the war. According to the representative of the English syndicate at Calgary, the high price is not likely to be maintained permanently, and when conditions become normal again, the exploitation of the product will cease to be commercially profitable. Last year more than 67,000,000 pounds of sodium sulphate were imported into Canada at the average price of \$18.50. About one-half of the total came from the United Kingdom and the other half from the United States.

Deposits of sodium sulphate are not abnormal; until recently they have been considered worthless. Their value is due to the fact that the manufacture of hydro-chloric acid practically ceased during the war.

The cost of each of the units to be installed at the claims north of Calgary will be from \$10,000 to \$15,000 and only about six men will be required to operate each unit. After the first has been installed, further extensions will depend largely on the state of the market, which is expected to hold up for some considerable time.

Agricultural Conference

Will be Attended by Officials From Every Department of Agriculture in Three Provinces

Dates are announced for the agricultural conference under the auspices of the commission of conservation in Winnipeg this summer. The conference which will be attended by officials from every department of agriculture in the prairie provinces, will open on July 14 and close on July 16. Subjects to be taken up will deal more particularly with the rate and extent of exhaustion of soil fertility throughout the entire west and proposals of the department to offset the drain of the past five years, during which time every available acre has been utilized for the production of foodstuffs. Special attention is also being paid to conditions in the drought areas. Forage supply and the preventing of soil drifting will also be taken up.

The River Jordan wanders 220 miles in covering a distance of 60.

A reptile's temperature fluctuates with that of its surroundings.

Canadian War Memorial

Sir George Perley Gets Deeds to Bourlon Wood, in France

Word has been received in Ottawa that Sir George Perley, the Canadian High Commissioner in England, has returned to London from France, bringing with him the deeds of the site for the Canadian battlefield memorial at Bourlon Wood.

The property was turned over by the Count de Francqueville, and a special decree of the French government was necessary for the transfer of the gift from a French citizen to a foreign government.

Bourlon Wood, like Sanctuary Wood and Polygon Wood, near Ypres will hold an imperishable place in the annals of the Canadian Expeditionary Force. It first came into prominence when General Sir Julian Byng, in command of the third British army, made a surprise attack on the Germans in November, 1917, without the usual preliminary bombardment. The attack on the wood was a great success at first, but the British had to abandon some of their gains after tremendous counter-attacks.

The section, however, remained in the hands of the enemy until the Canadian forces on Sept. 27, 1918, launched a brilliant attack which enabled them to cross the Canal du Nord and to press on through Bourlon Wood, and envelop Cambrai. The severity of the fighting between Aug. 22 and Oct. 11 may be judged by the casualties which the corps sustained. The number killed, wounded and missing amounted to 1,544 officers and 29,263 of other ranks. Of this number 24,509 were wounded.

Fire Loss Increased

Four Months Total This Year is the Sum of \$9,556,125

If fires continue to do damage as they have during the past four months Canada's fire loss in 1920 will greatly exceed the loss last year, and may reach the figure for the record year, 1918, says the Monetary Times. The four months' total this year is \$9,556,125 compared with \$8,241,289 for the same period in 1919.

The Monetary Times' estimate of Canada's fire losses during April, 1920 was \$3,229,500, compared with \$1,089,070 in April, 1919, and \$1,795,200 in March, 1920.

Six per cent has been the maximum legal rate of interest for 200 years on the Isle of Man.

Hunger Strike Analyzed

Is A Temptation to Every Offender Who Is Jailed

If anarchy is not to be produced, if order is to prevail, there must be a means of punishing those who break the law. Whether the law is a wise one does not affect the case. It is always possible for differences of any law. But good citizenship requires that the law be observed even by those who may not approve of it. Without a recognition of this principle there would be chaos where there should be order. Offenders, then, must be imprisoned. Humanity demands that they shall be treated decently and supplied with abundance of wholesome food. What more can the authorities do? If a prisoner in Dublin, charged with what may possibly be regarded as a political offence, can resist the operation of the law and obtain release by refusing to partake of food, a prisoner of any other class may do likewise. Once admit that such a course can succeed in defeating the ends of justice by obtaining the release of a prisoner, and a temptation is held out to every offender who is jailed to enter upon a hunger strike.

—Montreal Journal of Commerce.

Quite All Right

A number of English officers were sitting in a German restaurant in Cologne having a very good time for people who were away from home. They were struck by a rather lively conversation between the leader of the orchestra and several of its members. All of a sudden the orchestra began to play "Die Wacht am Rhein." Every one rose to his feet while the officers, including the English, stood at attention until the last note had been played. The leader was so surprised that he came down to the English officers and began the following conversation: "Gentlemen, may I ask you a question?" "Go ahead!" "Did you recognise the piece we just played?" "Sure." "Do you know that was 'Die Wacht am Rhein'?" "Why, certainly," said one of the Englishmen, raising his voice so as to be heard all over the hall; "but that's all right! Die Wacht am Rhein, that's us!"

The great orange-red butterflies migrate like birds in the fall, flying all the way from Canada to Cuba.

The nightingale proper is not found in either of the Americas.

Oil Strike Reported in Northern Alberta

Story That Enormous Pool of Oil Exists in Peace River Country

The Lethbridge (Alberta) Herald reports that "oil in commercial quantities, sufficient to practically prove the contention that an enormous pool of oil exists, has been struck in a new well in northern Alberta. The story is in the rumor stage as yet, but this is believed to be due to the fact that the promoting company which put down the well is keeping the news and location of the well a secret for the present, giving them a chance to blanket the surrounding country with leases."

"For a long time it has been known that the Peace River Country was underlaid with oil, but the attempts to reach it have only been partially successful. Doctor Dowling, Dominion geologist, on his last visit to Lethbridge, reiterated his firm conviction that the development work in the north would yet bring big results. This year's exploration promises to be the greatest yet, and if the above rumor proves authentic there will be a rush which will rival the great development now going on in Texas."

Sale of Land Brings Fortune to the Indians

Indians on the Piapot reserve about 20 miles northeast of Regina, find themselves in the fortunate position of being possessors of \$150,000 in cold cash as the result of the sale of 24 sections to the federal government for soldier settlement purposes. The department of Indian affairs secured their surrenders and transferred them to the soldier settlement board. The lands were sold recently at a sale conducted in this city and the land passed to the veterans.

To Train R.C.M.P. at Regina

Regina will be a special training depot where every man who enlists in the Royal Canadian Mounted Police Force will get his training. It was believed that another training depot would be established at Ottawa, but, according to officers of the force, Regina will be the only training depot.

Land Boom in Alberta

Dominion Land Office at Calgary Has Busy Season

Notable increases are shown over the corresponding month of last year in the returns or April of the Dominion Land Office at Calgary, Alberta, the net increase being \$30,703.68, while the figures for April, 1920 are \$67,065.22, and for last April, \$36,361.54. The largest increases are shown in the payment pre-emption and purchased homesteads alone amount to more than \$30,000. The increase is shown in all departments except the forestry branch.

In April, 1919, no quartz or placer mining claims were granted, but for April of this year 26 were applied-for, as a result of the miniature gold rush at Snake Creek early in April. Some came in on the last day of March, and there were 39 altogether filed on land south of Calgary.

Fees for petroleum and natural gas applications amounted this year to \$31,042.43, with 47 applicants; for April, 1919, with 77 applicants, the fee amounted to \$24,055.25. In soldier grant entries there were 25 for April as against nine for the corresponding month of last year. In homesteads 19 were granted last month as against 16 in April last year.

Soldier Settlement

Sell 69,000 Acres of Indian Lands to Ex-Soldiers

Practically the whole of the 69,000 acres of Indian reserve lands acquired by the soldier settlement board has been sold to soldier settlers. There are, however, in some of the reserves, a few farms to be disposed of. The government paid the Indians from \$10 to \$20 an acre for the land and the soldier settlement board disposed of it at cost.

In the case of Bobtail reserve, 6,930 acres, the purchase price was \$83,594. The board blocked it off into farm units and appraised each unit according to its comparative value, the aggregate selling price being \$3,596.64, being \$2.64 in excess of the amount paid the Indians for the whole reserve or eight cents more per farm.

There are 50 species of bats.

ALWAYS PURE AND SURE

It never fails to properly raise the dough. That's why most exacting housewives choose White Star Yeast.

6 Standard Cakes Each Carton

Concealed Seven German Stowaways

Hoped to Bring Wives Out Later; Will Probably Be Deported

Seven stowaways who arrived recently in New York by the Red Star liner Finland, and were not discovered until the steamship was nearing quarantine, awakened in the soul of her skipper, Capt. Newman, a fervent desire to know how it was possible for the seven to conceal themselves so effectually on a fourteen day trip from Antwerp, where they came aboard. The immigration inspectors also want to know the facts of the unusual case and started an investigation in conjunction with the skipper. All seven stowaways are Jews from Russian Poland, and are equipped with German passports. Under a quilling they admitted they had paid 1,340 francs to three steerage stewards who passed them into the ship at Antwerp.

The ages of the seven range from 21 to 37. Two are bakers, one is a painter and one, Solomon Marco, a furrier, said he went from Siberia to Germany and had suffered many hardships. Three are married and said they left their wives in Germany, hoping to send for them later. They pointed out the stewards, who will be held aboard the liner until acting Commissioner of Immigration Byron H. Uhl shall decide what to do with them. The stowaways were taken to Ellis Island, and will probably be ordered deported.

Historic Firth of Forth

Within Great Expanse Whole Fleet May Ride at Anchor

The Firth of Forth is, of course, one of the most notable things in all Scotland. From Kincardine, where it officially begins, to that imaginary line just west of the Isle of May, from the East Nook of Fife to the mouth of the Tyne, in Haddingtonshire, where it officially ends is a distance of 48 miles; while from shore to shore the expanse of water measures anything from one and a half miles, at Queensferry, to seventeen and a half miles off the Isle of May. Within this great expanse of water whole fleets may ride at anchor in perfect safety, and, although little is known of the great scenes which must have taken place in these waters during the last four years, the story of the Firth of Forth during the great war, culminating as it did recently in the surrender there of the German high seas fleet, will not be the least interesting of the many stories which still remain to be written.

Fire Prevention Campaign Among Farmers

Saskatchewan Fire Commissioner Issues Special Instructions For Farm Houses

A special appeal is being made by Arthur E. Fisher, fire commissioner for Saskatchewan, to the farmers of the province to assist in reducing the fire losses by observing the spring cleanup movement. — These suggestions will apply to the West generally.

"There is no class of people to whom fire prevention should appeal more than the farmers, who carry losses in mutual companies, as their premium notes are issued in direct proportion to the losses sustained by the company," said Mr. Fisher. "In brief," he added, "the smaller the losses the less money they will be obliged to pay under the mutual system to indemnify those who have suffered losses."

Mr. Fisher announced the following as urgent suggestions which would appeal particularly to the farmers: The barn is no place for the automobile. Build a garage.

Conserve your water supply. You may have drought or fire and need the surplus.

A pipe, cigar or cigarette has no place in the barn. Neither have greasy rags nor old coats with matches in the pockets.

Buy a fire extinguisher, but place it where you can get at it in case of fire, and see that it is frequently inspected.

Have two ladders long enough to reach the eaves of your tallest building.

Keep gasoline away from buildings and preferably underground.

Four ounces of common baking soda per gallon of water makes a splendid fire extinguisher. Four ounces of salt per gallon will keep water barrels from freezing except in extreme weather.

Keep your eye open for spontaneous combustion fires in wet grain, feed or hay.

Do not stack so that a fire will spread to your buildings. Keep straw and hay, etc., at a safe distance.

Allow no weeds or grass to grow about the buildings.

Put up "no smoking" signs about the barns and other buildings. We can supply you for nothing. Write for them.

Keep your matches in a metal box away from children.

Examine chimneys and stoves frequently.

Most losses on farm property are due to these causes, given alphabetically: adjoining buildings, ashes, children, defective flues and fire places, stoves and stove pipes, lamps, lighting, matches, rubbish and sparks. Carelessness figures in all.

Political Picnic Revived

The coming summer will see a revival of the old-time political picnic. Leaders of the United Farmers of Ontario, the party now in power in the legislature, are already laying plans for these outdoor gatherings where political questions are thrashed out. Headquarters of the United Farmers of Ontario in Toronto have already received many requests for speakers for picnics in June.

Kingbirds devour an enormous number of injurious insects and relatively few honey bees.

AutoStrop Razor — sharpens itself

EXPERIENCE shows that only a sharp blade can give a perfect shave, also that a blade cannot remain sharp without stropping. Couple these facts with the further fact that the AutoStrop Razor is the only safety razor that sharpens itself, and you will be in no doubt as to which safety razor to use.

Any dealer will demonstrate the AutoStrop Razor to you, guarantee satisfaction, or refund of purchase price.

Only \$5.00

complete with strop and twelve blades in an attractive assortment of cases to suit any purpose.

AutoStrop Safety Razor Co., Limited
AutoStrop Building, Toronto, Canada

Submarines Losing Their Efficiency

Advantage Previously Possessed Now Steadily on the Wane

Submarines have lost two-thirds of their efficiency since 1914, according to Lieut. W. S. King-Hall, R.N., in a recent address at the Royal United Service Institute on "The Submarine and future Naval Warfare."

The speaker maintained that the advantage previously possessed by the submarine was steadily on the wane. Whereas at the beginning of the war in 1914 it was as nine to one against the surface ship, it was only seven to three in 1919, and was likely to be only six to seven in 1930. He was of the opinion that within the next few years there would be a great development of submarine detecting apparatus which would give large and important ships a certain measure of protection against tactical attack by submarines.

He regarded as impracticable the proposal that battleships should be made submersible. He ventured the opinion that the use of gas might eventually revolutionize naval warfare much as gunpowder did when it was first introduced. It might be discharged with deadly effect on an enemy coastline. It was actually suggested during the German occupation that the Belgian coast should be "gassed," but the plan was abandoned "in deference to Belgium's susceptibilities."

Movies in Schools

Manitoba Educational Association Is Investigating Possibilities Of the Movies

The extensive general use of motion pictures in public schools in the near future, was forecasted at a recent session of the annual convention of the Manitoba Educational Association with a view to investigating the possibilities of the utilization of its advantages to the fullest extent in Manitoba.

A committee of nine leading members of the association was appointed. This committee will report its findings to the executive in December for consideration of the next annual convention.

Watches vary, but the average number of different parts issued to be 175. To manufacture a watch it has been estimated involves no less than 2,100 separate and distinct operations.

A Famous Motor Boat

Attains A Speed of Forty Knots With Full Armament and Crew

At the recent motor-boat exhibition in London, England, the most attractive exhibit was the famous coastal motor boat C.M.B.4, from the Baltic after many cruises, during which she passed through lines of forts and torpedoed the Bolshevik cruiser Oleg. This vessel is a skimover or hydroplane of the type invented before the war for sporting purposes. It attains a speed of 40 knots with full armament and crew. The show contained many British examples of small auxiliary motors, which can be attached to rowing boats and other small craft. Some of these are installed on board and others are attached to the stern without structural alterations. One pattern, with an engine rated at 2 to 3 horse power, weighs only 60 lbs. complete with propeller and steering gear.

Waited Too Long

"Where are you going?" the dentist asked a man who started to leave the waiting-room. "I've been here 45 minutes for you to pull a tooth for me." "Well, I'm ready for you now, step in the waiting-room." "I'm not ready for you now doc. When I first came in here I was chock full of doughboy courage, but every second some of it oozed away, and now I guess I must feel about the same way a German in a dugout felt just after he had shouted 'Kamerad!' and was not certain whether the answer would be a hand grenade or an order to march to the rear."

Pompeii, just before its destruction was wrestling with the problem of suffragette pickets.

Ladies Perfume Your Skin With Cuticura Talcum

Antiseptic, prophylactic, deodorizing, fragrant and refreshing. Cuticura Talcum is an ideal face, skin, baby and dusting powder. Convenient and economical, takes the place of other perfumes for the person. A few grains sufficient. One of the indispensable Cuticura Toilet Trio for keeping the skin pure and sweet.

Cuticura Soap 25c, Ointment 25c and 50c, Talcum 25c, plus Canadian Postage. Sold everywhere. For sample, write to: Cuticura, Dept. B, Boston, U. S. A.

The oldest, largest and most important manufacturing of automobiles in Barcelona, Spain, has an annual output of 2,000 cars.

A Constipation Cure

A druggist says: "For nearly thirty years I have commended the Extract of Roots, known as Mother Selig's Curative Syrup, for the radical cure of constipation and indigestion. It is an old reliable remedy that never fails to do the work." 30 drops thrice daily. Get the Genuine, at druggists.

"There's a Reason"

Frame New Plans Which May Restore Order in Ireland

London.—General Sir Neville Macready, military commander of Ireland has framed new plans by which he believes better order will be established in Ireland shortly. Mr. Bonar Law announced in the house of commons that the plans had been approved by the cabinet.

The government leader's statement followed questions regarding the sensational murder of two policemen at Cork, and whether General Macready had taken steps to co-ordinate with the police and the military forces.

Mr. Bonar Law said that the military commander had already taken most important steps, and at a cabinet meeting had proposed others, which met with the approval of the government. What these steps were Mr. Bonar Law did not say. He declared, however, that the government would take any action which in its belief would restore decent conditions.

General Macready is at the present time in London for consultation with the officials, and the newspapers predict important developments. In this connection, it is unofficially stated, that additional troops are to be sent to Ireland and that the government is prepared to give the Irish executive all assistance necessary to suppress lawlessness.

Bloodthirsty Bolsheviks

Eighteen Men and Seven Women Executed at Jitomir by Order of Commission

Warsaw.—Eighteen men and seven women were executed by order of a Bolshevik extraordinary commission in Jitomir just before the capture of that town in the Polish drive on Kiev, according to despatches from the front. The messages also give details of the alleged massacre.

Serious Shortage of Farm Labor

Winnipeg.—Only about 40 percent of Manitoba's wheat lands can be worked this season unless there is a marked increase in the number of the people willing to go to work on farms during the next few weeks, Manitoba farmers say.

According to T. J. Mather of the Dominion employment bureau, the situations left vacant during the last week is nearly three times the number of applicants placed.

Carranza Officials Wiped Out

El Paso, Texas.—High officials accompanying President Carranza in his flight from Mexico City towards Vera Cruz were captured or killed in an engagement between the federal escort and revolutionary troops under General Reyes Marquez, according to a telegram received from General Alvaro Obregon by R. E. Priskura, financial agent for the revolutionary movement here.

LET "DANDERINE"

SAVE YOUR HAIR

Get rid of every bit of that ugly dandruff and stop falling hair

To stop falling hair at once and rid the scalp of every particle of dandruff, get a small bottle of "Danderine" at any drug or toilet counter for a few cents, pour a little in your hand and rub well into the scalp. After several applications all dandruff usually goes and hair stops coming out. Every hair in your head soon shows new life, vigor, brightness, thickness and more color.

Sheriff Gets Ex-Kaiser

Imperial Throne and Trappings to be sold by Auction in New York

New York.—The Imperial German throne is to be sold here two weeks ago by the purchaser and importer, Valdemar Pevelson. He declared he had considerable difficulty in getting an export permit from the German government which was against this, but he had promised to buy food with the net profits for resale in Germany.

Authenticity of the art objects is vouched for by one of Berlin's most reputable art firms. Three complete salons with portieres embossed with German eagles, wall hangings, rugs made to order in the Orient for the former kaiser, and antiques which have belonged to the Imperial German and Bavarian families for centuries, are said to be included in the collection. These sets of furniture were in the collection, the throne of red plush, embroidered with Prussia eagles, also, are advertised for sale.

According to Mr. Pevelson, the ex-kaiser was not always prompt about paying his bills. Immediately upon his flight to Holland, patience was exhausted and creditors seized household belongings in payment for the accounts.

Premier Borden Returns

Has His Old Vigor and Declares He Is Now in Perfect Health

Ottawa.—Bronzed and apparently in excellent health, Sir Robert Borden has arrived in Ottawa.

Sir Robert showed no traces of the illness which had necessitated his five months' holiday. He had the old vigor and to all queries he smilingly replied that his health was the best. His arrival was the occasion of a celebration by his supporters. Headed by Sir George Foster and members of the cabinet, they gathered on the platform to welcome him back to Ottawa. As Sir Robert and Lady Borden stepped off the car there was a round of cheering. On the platform with the Unionists was Dr. Clark, member for Red Deer, and prominent in the National Progressive party. It was Dr. Clark's birthday. Sir Robert and he laughingly congratulated each other.

"You look younger than I do," Dr. Clark observed.

Distribute Seed Grain

Requirements of Settlers in Alberta Have Been Supplied

Edmonton, Alta.—The distribution of seed grain for settlers' spring requirements throughout Alberta has now been completed, and the department of agriculture is calling in its field men. The total supplies of seed given out this season have not yet been tabulated, but it is estimated by officials of the department that they will represent a money value of close to \$750,000, which is about twice the expenditure of last year and the largest of any one year since the government undertook this method of relief. All the grain thus supplied for seeding purposes has been Alberta grown.

Loan Farmers Seed Wheat

Winnipeg.—The provincial government has loaned the farmers of Manitoba a total of \$264,000 so far this year for the purpose of seed wheat.

Huns to Answer For War Crimes

Germans Charged With Acts of Inhumanity Are Named in New List

Berlin.—Men accused of acts of inhumanity are named in the new list of Germans accused of violations of the law of war which has been presented to the government by allied nations.

Among them are four U-boat commanders said to have torpedoed hospital ships; General Stenger, who is alleged to have ordered that wounded prisoners be shot, and officers who carried out that command. Field-marshal Buelow, former commander of the second German army; General Von Below, General Von Langemann, Prince Ernst of Saxony, and General Krusa, commander at the Kaiser prison camp, are charged with spreading germs of typhus, while General Von Oven, former governor of Metz; General Scholtz, camp commander at Hohenhausen; General Huff and Dr. Michelson, are charged with killing, ill-treating and robbing prisoners. Demand is that they be brought before the supreme court at Leipzig.

Toll of White Plague

42,920 Deaths From Consumption in Canada During Five Years

Ottawa.—Dr. D. C. Parfitt, Muskoka, and Col. W. A. Hartt, tubercular specialist, were called by the special committee on pensions in regard to tuberculosis among soldiers. Dr. Parfitt said there were 35,684 Canadian soldiers killed in action in five years, while the number of deaths from tuberculosis in five years was 42,920.

There were 8,508 tubercular cases in the Canadian Expeditionary Force during five and three-quarter years to April 30, 1920. The incidence rate per thousand in five years was 501. There had been an increase of incidence in the last two and a half years of 16 percent. The incidence ratio (crude) of tuberculosis per 11,000 enlisted men was 144 (fourteen decimal four). The incidence ratio among the British expeditionary force was 614 per 1,000 (six decimal fourteen). Incidence in Canadian expeditionary force was 120 percent greater than in British expeditionary forces.

Anonymous Gift to Britain For War Debt

London.—Chancellor of the Exchequer, Austen Chamberlain, announced that he has received an anonymous gift of \$130,000 of the war loan for cancellation and as a contribution to the reduction of the national debt. The donor, explains Mr. Chamberlain, says that he denied the privilege of fighting for his country and that he desires to encourage other persons to similar patriotic action.

Municipality Rights

Ottawa.—Hon. Arthur Meighen, has secured the first reading of a bill which seeks to give municipalities the same rights as hitherto enjoyed by the provinces in the matter of regulating employment offices.

Has Tried Them

Has Faith in Them

ERNEST SMITH TALKS OF DODD'S KIDNEY PILLS

Quebec Man Grateful for the Benefit He Has Received, Pays Tribute to Dodd's Kidney Pills. Grand Pabos, Quebec, May 17th.—(Special).—Mr. Ernest Smith, a highly-respected resident here, is one of the many who have abiding faith in Dodd's Kidney Pills as a remedy for sick kidneys.

"I have suffered from my kidneys," Mr. Smith says, "and I read that Dodd's Kidney Pills were good, so I tried them. They have helped me so much that I will continue to use them when my kidneys trouble me." The kidneys require constant attention if good health is to be maintained and serious disease ward off. The kidneys perform a most important work in the human system. They strain all the impurities all the seeds of disease, out of the blood. When they are weak and unable to do their work the system clogs and sickness is the inevitable result. Ask your neighbors if Dodd's Kidney Pills are not the best remedy for weak, disordered or diseased kidneys.

Sir Arthur Currie Appointed Principal Of McGill University

Huge Deficit of C.N.R.

Report of Earnings and Expenses for Past Year Tabled in The House

Ottawa.—Gross earnings of the Canadian Northern railway for the year ended December 31, 1919, were \$53,562,177.57, according to the fifth annual report of the directors tabled in the house by Hon. J. D. Reid, minister of railways.

These were derived as follows: From passenger traffic, \$10,775,708.46; from freight traffic, \$39,175,555.00; express, mail and telegraph, \$1,538,902.18; miscellaneous, \$3,337,014.81.

In addition, there were interest and other subsidiary companies that contributed the balance.

Working expenses amounted to \$60,034,023.92, and hire of equipment, taxes, rentals, and miscellaneous operations, \$1,020,553.61, making the total expenses \$61,054,577.00. The deficit was \$5,706,447.70, and interest charges \$19,969,710.36, a total deficit of \$25,676,358.06.

The directors call attention to the fact that the report covers only the operation of Canadian Northern railway lines.

The total mileage operated at the end of the year was \$9,685.7, compared with \$9,566.5 at the end of 1918, being an increase of 119.2 miles. The average mileage in operation throughout the country was 9.68 miles.

Soviets Grant Concession

Bolshevik Authorities Have Agreed To Save Lives of All Anti-Soviet Soldiers

London.—Bolshevik authorities have agreed to spare the lives of soldiers separated from General Denikin's army in Southern Russian, and those of other anti-Soviet troops, who may in future be taken prisoner. A note to this effect was today received by British officials in answer to a message to the Russian officials. This is the most satisfactory note on this subject yet received from the Soviet government, and officials hope Denikin's men with trade agreements or other concessions to the Soviet government.

Mennonites Would Like to Stay

Reported to Have Asked Manitoba Government for Tract of Land

Winnipeg, Man.—The Mennonite situation took a further new turn when it was learned that during the past few days, despite reports to the contrary, it has become evident that the Mennonites in Manitoba do not wish to leave the province, but would prefer to make a change in the location of their colony from the present well-settled district to some more remote portion.

They have asked the provincial government, it is stated, to go over the map of the province, and if a tract of country could be found where there were no settlers and where settlers would not go because of the rigorous climate, or the poorness of the land, to allow them to take it over with the privileges of education and religion which are denied them in their present location in southern Manitoba. The Mennonites, it is declared, possibly have in mind the large tract of open country bordering on the Hudson's Bay. The provincial government, however, has not entertained for a moment any idea of such concessions.

Germany Estimates Damage

Berlin.—Germany has made an independent appraisal of damage done in devastated districts in France and Belgium, and has incorporated her findings in a detailed memorial which will be presented to the allied representatives immediately, according to a recent statement.

Montreal.—Lieut.-Gen. Sir Arthur Currie, who commanded the Canadian forces in Flanders, and who has been offered the post of principal of McGill University, has accepted the post. Sir Arthur Currie is at present inspector-general of Canadian militia.

The statement issued at McGill University is as follows:

The board of governors have appointed General Sir Arthur Currie, G.C.M.G. K.C.B., D.S.O., principal and vice-chancellor of McGill University.

In offering Sir Arthur Currie the principalship of McGill, the governors were influenced by the conviction that the university needs at the present time, above all other things, a principal with exceptional powers of organization and administration and endowed with a tried capacity for inspiration and leadership. The sustained brilliancy of Sir Arthur Currie's record in the great war will always throw an added lustre upon the most glorious annals of our country.

His achievement as general commander of the Canadian army won him a reputation unsurpassed, if not unrivalled, by that of any general in the British forces.

"They were accomplished not alone by his skill as a soldier, but also by the patient, constructive and far-seeing qualities of a statesman with which he welded the Canadian units into an organization, which, we are proud to believe, was the best and most efficient army corps at the front. His war despatches were notable for their clearness and descriptive excellence, while his messages to the Canadian army were characterized by a loftiness of tone and a noble simplicity of utterance which attracted the admiration of all English-speaking peoples. The qualities which made him an incomparable organizer and a leader at the front fit him preeminently for the headship of a great Canadian university.

"The appointment to the principalship of one who, beyond six years' experience as a school teacher, is without academic affiliations may come as a surprise to some of the friends of McGill. But the governors were supported by the sanction of high educational authorities in inviting Sir Arthur Currie to accept the position.

"He was singled out and his appointment enthusiastically urged by Sir Auckland Geddes, and the suggestion was emphatically approved by the Master of Balliol and Professor W. G. S. Adams, fellow of All Souls, Oxford, who rank with the most eminent educationalists in the British Isles. The two high academic personages united with Sir Auckland in the belief that McGill would be singularly fortunate if it succeeded in securing Sir Arthur Currie's services and there is no one, either in Canada or Great Britain, whose name they could put alongside his for consideration.

SITTING A HORSE.

Rough-riding Westerner Talks About
Royalty.

Pictures of the country's recent guest, the Prince of Wales, engaged in assistant cow punching in the West and riding a Western saddle in the Western fashion, have been generally printed in the newspapers. Perhaps even in this age of automobiles there are horsemen enough still left to share the interest in the exhibition expressed by a Canadian writing in the Daily Mail of London. "Yesterday," he writes, "I was comparing a photograph of the Prince of Wales taken in Hyde Park and another of him taken during his tour in Canada. In the first he sits an Irish hunter on an English hunting saddle. He has the seat of a born cavalier. In the second he sits a Canadian bronco on a California stock saddle (a stock saddle has a high cantle, a horn, and is ridden with a long stirrup). His heels are up and he is 'all of a hump'."

"Horsemen in Canada smiled indulgently at the prince's father when, as the Duke of Cornwall and York, he made similar tour to the one his son recently made and first put leg across Canadian horseflesh. Englishmen could not sit a horse, they proclaimed. They were all right for hacking about, but when it came to riding—real riding—they were not in it."

"I recall well the day the riding master strode into the Royal Northwest Mounted Police stables at Regina and announced that he was looking for a high-stepper to carry the heir to the throne. No 'mean' tricks, some sense and plenty of style was he called for."

"I was in the fough-riding squad at the time, and we paraded a few of the 'perfect ladies' that we had in the stables. He chose a bay mare who had brains enough to do almost anything except talk, and told me to school her and get her into shape for royalty."

"Some weeks later the duke—today's King—rode through the lines on that same little bronco and inspected the Northwest Mounted Police. He inspected us casually, I am afraid, for she was giving him a lot to do. He did not understand the stock saddle and the biting."

"We, on the other hand, inspected his Royal Highness critically. We liked his horse but we did not approve of his seat. Englishmen certainly could not sit a horse."

"Many years later we came to the war. And we saw Englishmen, many of them sitting on horses. At first we were inclined to sneer. There was nothing about the management nor the handling of horses they could teach us."

"But we worked side by side with crack British cavalry regiments, and they kept their horses in as good fettle as we did, and seemed to make longer marches with as little fatigue. We began to wonder if, after all, there might not be something in the English seat and the English saddle."

"Finally our lot got out up a bit and for reinforcements we got Household Cavalry horses with universal saddles. And our boys looked 'all of a hump' for a week or two; that sitting a 'mean' horse in a universal saddle takes horsemanship. Sitting the same horse in a stock saddle is like sitting in an easy chair."

"So now we agree that Englishmen are something more than park riders, and we do not smile indulgently when we see the young prince 'all of a hump' on a bronco."

Flour has taken a jump and will retail at \$8 per bag within a few days!
